

AfricaAI: Runbook – SHFEMVD – SHFE

<u>Summary</u>	We would like the tabular data corresponding to SHFE Member Volume data described below.
<u>Source name</u>	Shanghai Futures Exchange - SHFE
<u>Link to the source</u>	https://tsite.shfe.com.cn/eng/reports/statistical/daily/ https://www.shfe.com.cn/eng/reports/StatisticalData/DailyData/
<u>Dataset name</u>	SHFE Member Volume Data- SHFEMVD
<u>Frequency</u>	Daily
<u>SLA</u>	Check for data availability each business day.
<u>Expected Time</u>	Before 08:00 AM UTC

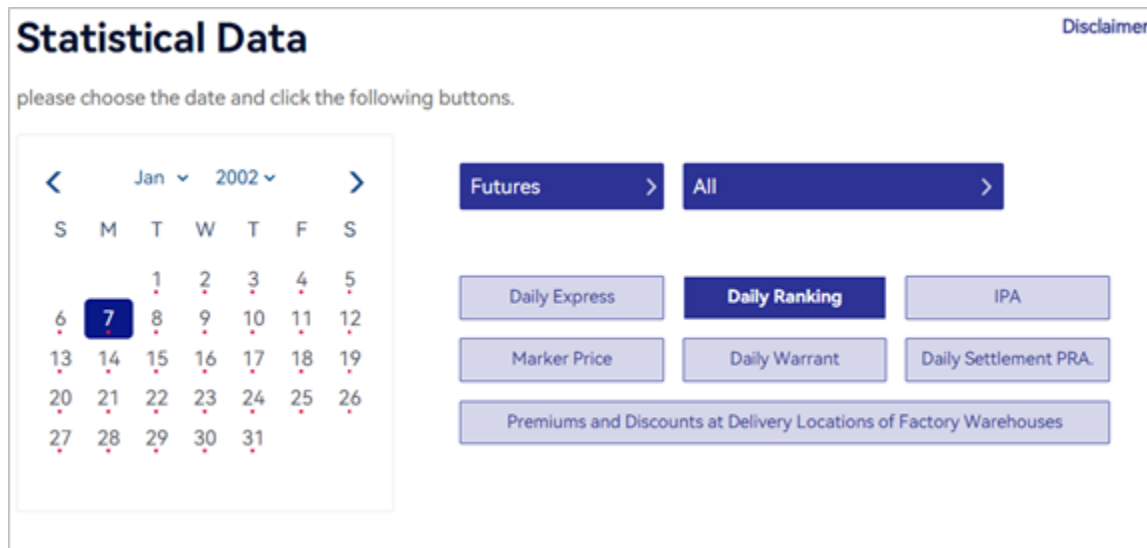

Instructions:

1. **NB! This data should be processed only via your AWS workspace.**

Go to the link: <https://tsite.shfe.com.cn/eng/reports/statistical/daily/>

<https://www.shfe.com.cn/eng/reports/StatisticalData/DailyData/>

Set up the Daily ranking statistical data as shown on screenshot below:

The screenshot shows the 'Statistical Data' page on the SHFE website. At the top right is a 'Disclaimer' link. Below the title, it says 'please choose the date and click the following buttons.' On the left is a calendar for January 2002, with the 7th selected. On the right are several buttons: 'Futures' and 'All' (both with right arrows), 'Daily Express', 'Daily Ranking' (highlighted in dark blue), 'IPA', 'Marker Price', 'Daily Warrant', 'Daily Settlement PRA', and 'Premiums and Discounts at Delivery Locations of Factory Warehouses'.

1. Find the export data to csv (“Export excel”) button at the bottom of the page with tables:

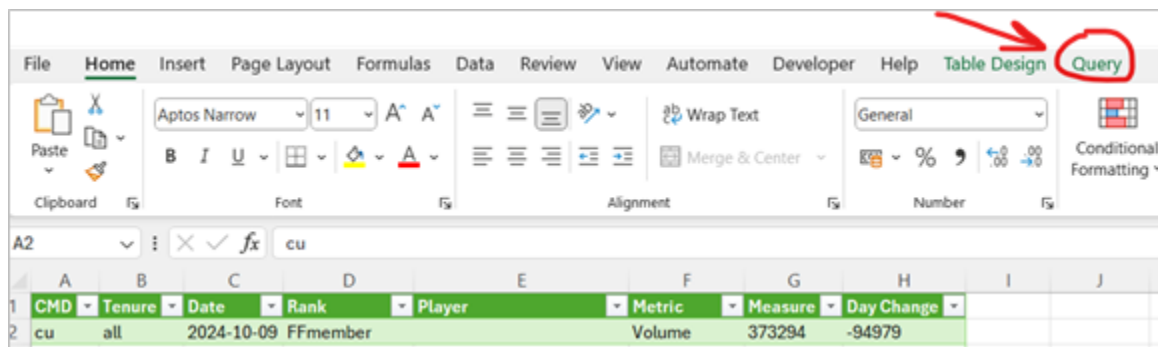

19	8103 (brokerage business)	2437	1616	19	8042 (brokerage business)	856	178	19	8082 (brokerage business)	826	-18
20	8240 (brokerage business)	2409	1680	20	8151 (brokerage business)	812	-22	20	8274 (brokerage business)	802	101
Total		86664	47602	Total:		26764	179	Total		23883	50

Export Excel
Export TXT
Print

1. Save uploaded file to folder. **Resave the file in the CSV UTF-8 format.**

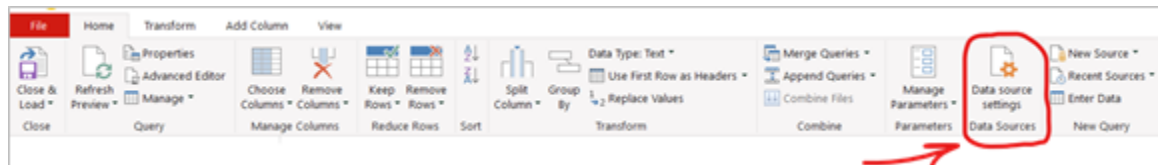

1. Open "Query_v3.1.xlsx" file.

Select any cell in the table, then in the menu at the top of the file, click on "Query":

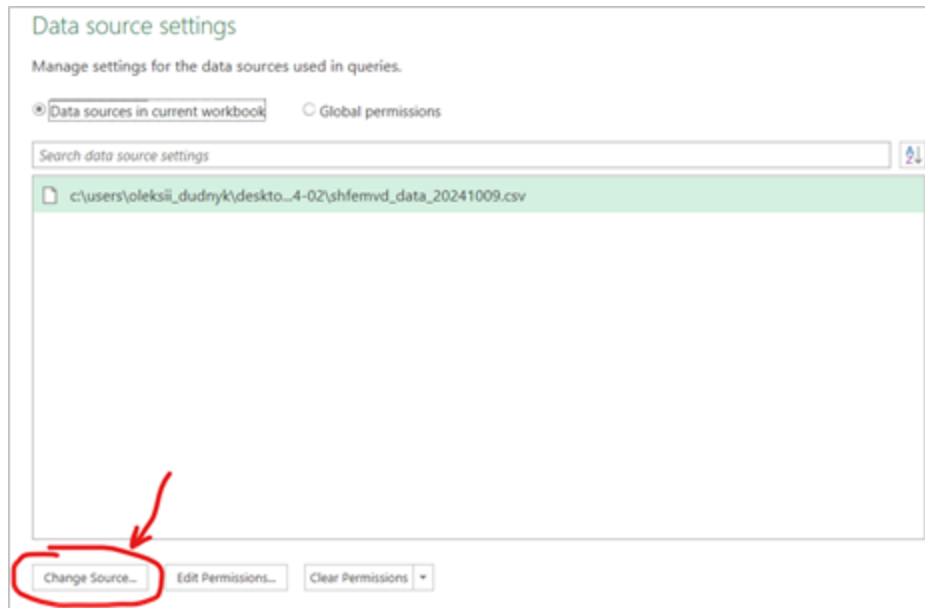

1. In the menu that opens, click "Edit":

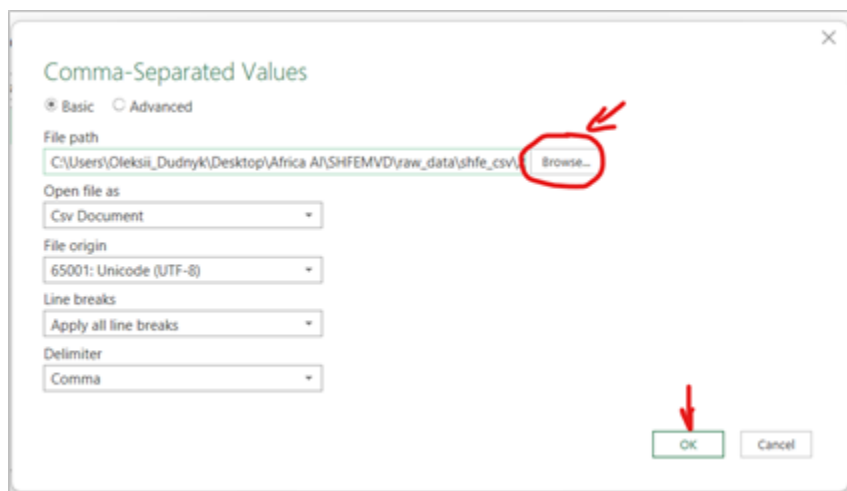

1. The editor page will open. Find "Data source settings" in the menu at the top and click:

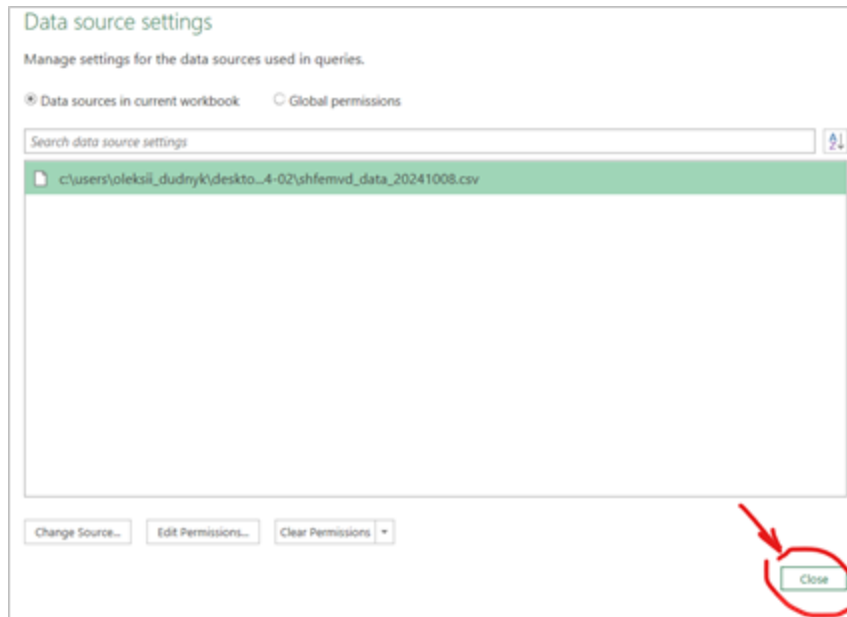

1. In the window that opens, click on the "Change source" button:

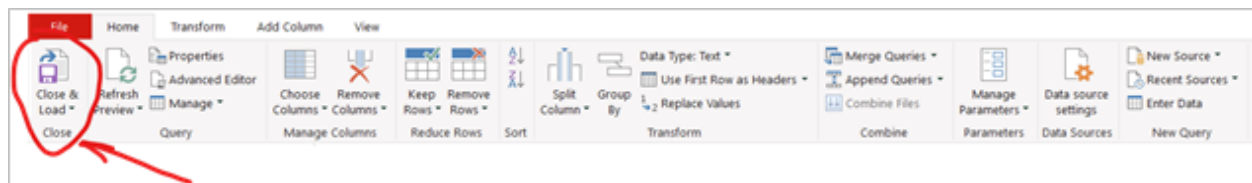

1. In the window that appears, click the "Browse" button and select the previously downloaded source file (select file and click "Import" button), then click Ok:

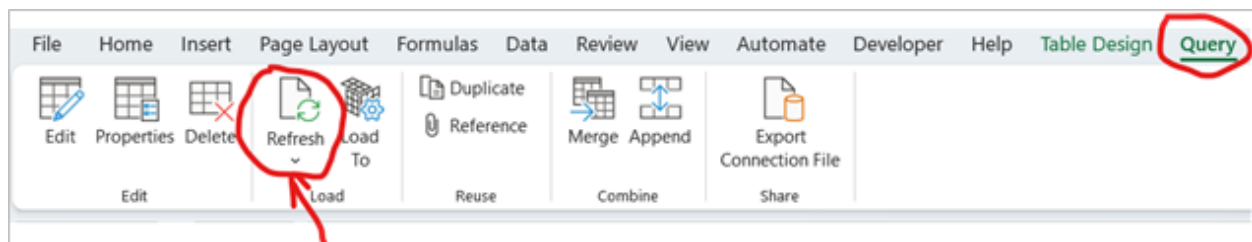

1. Then click "Close":

1. In the menu at the top of the window, click "Close and Load":

1. The data in the table should update automatically in 10-15 seconds. If the data has not updated after the specified time, click on the "Queries" tab and click on the "Refresh" button:

1. Copy the table from the "Query_v3.1.xlsx" file to a new file and save it in the csv format.
2. Check that the values in the csv file match the values in the table in the "Query_v3.1.xlsx" file.

Note that the Date column will be empty. It is necessary to copy the date value from the source file (from Date) to all rows of the new file (column Date):

	A	B	C	D	E
1	SHFE Member Volume, Open Interest Rankings				
2					
3	Date:	2025-06-23			
4	Note: Futures-company may not engage in trading c				
5	Member T Total Volu Change fr Member T Total Long				
6	Contract Code : cuall				
7	FFmember	260284	-18596	FFmember	521151
8	non-FFme	2150	-1196	non-FFme	4088
9	Ranking	Name of F	Volume	Change fr	Ranking
10	Contract Code : cu2507				

The date format for the values in the "Date" column must be mm/dd/yyyy. Make sure the values are in the correct format. If not, change the format to the required one.

When new data appears, add rows with new data to the current file “SHFEMVD_DATA.csv” (please note that new data should be placed higher than older data).

Upload the csv file (without archiving) to SFTP folders:

SFTP folders:
